

WEB INSPECTION TOOLS FOR PRINTERS AND CONVERTERS

## miipStrobe: Inspection LED stroboscope

The **miipStrobe** is an industrial, heavy-duty LED stroboscope designed specifically for printing and converting applications.

This stroboscope will easily allow your operators to visually inspect and monitor print quality and die cuts by freezing repetitious motion.

Due to its **superior light and superior coverage** area, the **miipStrobe** will quickly become an **essential production tool**.

## FEATURES

The **miipStrobe** system, designed to service printing and converting applications, offers some innovative features:

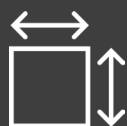

Wide coverage area  
to simplify defect  
inspection

One-button  
interface for easy  
control

Auto switch  
between manual  
and synchronized  
modes

Energy efficient LEDs  
which require no  
replacements

Synchronized input  
to facilitate usage

Memory settings  
to speed up  
setup time

## BENEFITS

The **miipStrobe** system offers sophisticated benefits to high-end printing and packaging clients:

### INSPECTION

Discover last-minute defects  
Inspect a wide area  
Monitor print quality and die cuts

### EFFICIENT

One-button user interface  
Easy install on printing presses and  
rewinders

### INTEGRATION

Synchronize presses with **miipGear**  
sensors  
Synchronize rewinders with 3rd party  
sensors

## SPECIFICATIONS

### Applications

Printing  
Laminating  
Die cutting  
Finishing

### Flash Rates

Up to 150 flashes per second at max intensity

### User Interface

Intuitive, one-button interface

### Light output

7550 Lux (at 12"/ 30 cm)

### Accessories

Tri-Tronics Label Eye Sensor  
**miipGear** Sensor  
Custom-made adapters for slitter equipment strobe outputs  
Installation bracket

### Support

Excellent response time and support from the miipStrobe service team

### Inspection Area

43 cm x 21 cm at 30 cm  
17" x 8" at 12"

### Power

24V, 5A with 110-220 VAC adapter

### Dimensions and Weight

3.5 lb, 5.5" x 5.75" x 10"  
1.6 kg, 14 cm x 14.6 cm x 25.4 cm
